### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian K. Dutton on 5/11/07.

The application has been amended as follows:

- In claim 1, line 36, replace "object." with --object; and wherein two or more lighting fixtures are selected and specified with respect to said output-characteristic data as well as said positional data, said method including the steps of: (i) selecting two or more lighting fixtures as variable components, and varying at least one of said output characteristic data and said positional data of said lighting fixtures to determine the discrete elements to be illuminated by said lighting fixtures selected as the variable components; (ii) referring to said lamp-by-element tables only associated with thus determined discrete elements and modifying the lamp color component values stored in the referred lamp-by-elements tables for said lighting fixtures; (iii) summing the lamp color component values in each of the referred lamp-by-element table to give summed lamp color components values associated with each said discrete element, and allocating the summed lamp color component values to said discrete elements, thereby realizing the updated color distribution over the array of the discrete elements.--.

Art Unit: 2628

- Cancel claim 2.
- In claim 3, lines 1-3, replace "A simulation program for creating a virtual three-dimensional scene illuminated with multiple lighting fixtures, said program being adapted to be stored in a recordable medium for execution at a computer and comprising:" with --A computer readable medium having a computer program stored thereon for creating a virtual three-dimensional scene illuminated with multiple lighting fixtures comprising:--.
- In claim 3, line 32, replace "lighting fixture;," with --lighting fixture;--.
- In claim 3, line 47, replace "display." with --display; said lighting control module further providing for selecting two or more lighting fixtures as variable components, and varying at least one of said output characteristic data and said positional data of said lighting fixtures to determine the discrete elements to be illuminated by said lighting fixtures selected as the variable components; said recalculation module further referring to said lamp-by-element tables only associated with thus determined discrete elements and modifying the lamp color component values stored in the referred lamp-by-elements tables for said lighting fixtures; said color allocating module further summing the lamp color component values in each of the referred lamp-by-element table to give summed lamp color components values associated with each said discrete element, and allocating the summed lamp color component values to said discrete elements, thereby realizing the updated color distribution over the array of the discrete elements.--.

Art Unit: 2628

- In claim 4, line 43, replace "display." with --display; said lighting control unit further providing for selecting two or more lighting fixtures as variable components, and varying at least one of said output characteristic data and said positional data of said lighting fixtures to determine the discrete elements to be illuminated by said lighting fixtures selected as the variable components; said recalculation unit further referring to said lamp-by-element tables only associated with thus determined discrete elements and modifying the lamp color component values stored in the referred lamp-by-elements tables for said lighting fixtures; said color allocating unit further summing the lamp color component values in each of the referred lamp-by-element table to give summed lamp color components values associated with each said discrete element, and allocating the summed lamp color component values to said discrete elements, thereby realizing the updated color distribution over the array of the discrete elements.--.
2. The prior art of record fails to teach or suggest the language disclosed in claim 2, which has been incorporated into each of the respective independent claims.
  3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2628
